Test your memory  
not about arithmetic  
or the things that you should already know  
it's 11:30 and it's too early  
to close your eyes  
just to say goodnight

Don't turn out the light  
don't say goodnight  
we can't let you dream  
don't close your eyes  
don't say goodnight  
we can't let you down

The lakes lifted off the ocean floor  
were smoking cigarettes  
try not to forget  
anything she said  
or hollow me bones to show  
how spineless I am

Don't turn out the light  
don't say goodnight  
we can't let you dream  
don't close your eyes  
don't say goodnight (it's 11:30)  
we can't let you down (and it's still early)
