"The Winter"

Visit "[The Winter](#)" on MotoLyrics.com

Take it all, take it all, take it all
I'm just a man, waiting for the winter

Now you're gone, now you're gone,
now your gone
so far away, I stand here by the window

And we've got one chance to make it through
One time and it's all for you will you stay, with me
forever

LOVE SONGS are nice to sing for you, for me,
but nothing seems, to outlast the winter.

Now I'm drawn, here your call, through the fog
I stumble on, you're the only one who sees it

Please don't run, please don't run,
please don't run
I have a plan, I promise it works out perfect
