[Intro]

Just to listen to this...
She's the one you could call, different...
Same day another incident...
No coincidence...
Look girl we been into this...
You the one that sparked my interest...
And the simplest...
Way to explain the love...
Is to mention this...
Your my, my, my number one...

[Verse One]

The one that I wanna dream about BUT...
Can't sleep without your touch...
Your love has got me nuts and got me running without
a crutch...
I'm bout to f-fall inside your web so hold me down girl...
Don't act like its all in vain and you don't know me now
girl...
We been through this, through the ins and outs...
We,been to the point can't live each..other...
-Another doesn't seem as right, we gotta, see the
light...
If you want a dream is me tonight...
I see the right..type, its right in front of me...
The one thats loving me has always wanted me and
come to me...
..She comforts me...
Through the situations that cause impatience...
The phases that make this face stay and play sick and
say this...
Say..this...

[Chorus x1]

Your my number one, can't give you up...
And I can't see, me without you...
Number one, all I ever want, all I ever need...
My number one, you and me...
Its you and me, you and me against the world...
And I'll never leave, you got my word...

Number one...
Won't give you up...
And I can't see...
Me without you...
Number one...
All I ever want its you and me...
Number one...

[Verse Two]

My sidekick, I die with, I choose to ride with...
-You, And ain't a reason in the world for me to lie to
you...
I side with you through the thick and thin...
Through the fights and the times we make amends...
..Take in the hate from all the others wanna break us
in...
They know they jealous so they wanna embellish it all...
Heaven or fall, through the dust we settle it all...
Inevitable we are let the love evolve...
Yet to fall, victim listen this is what's standing tall...
We..grinding hard and they, scared to face us, save
they faces...
Game is aces, play this, try to fade us, hate us 'cause
its love...
..But yet their jealousy is never gonna say enough...
And ain't another wanna come against this...
Ain't another couple wanna run and miss this...
Its senseless and yes its true, that'll be a shame...
My number one its you I want so how do I explain...

[Bridge]

Your my number one loving it gotta covet and run with
it all...
Something no other coming could offer, you are...

[Chorus x1]

Your my number one, can't give you up...
And I can't see, me without you...
Number one, all I ever want, all I ever need...
My number one, you and me...
Its you and me, you and me against the world...
And I'll never leave, you got my word...
Number one...
Won't give you up...
And I can't see...
Me without you...
Number one...
All I ever want its you and me...
Number one...
