Butters gets to know AWESOM-O)  
Hey there have you heard about my robot friend?  
He's metal and small and doesn't judge me at all.  
He's a cyberwired bundle of joy.  
My robot friend.  
I like to dip and daddle with my robot friend.  
He's smart as can be and emotion-free  
And he's computin' his way to my heart.  
My robot friend.  
My robot friend.  
My robot friend.  
My robot ...friend.

(Butters and AWESOM-O in Los Angeles)  
I'm hangin' out in LA with my robot friend  
We're havin' such fun in the hot hot sun  
We're two of a kind- That's me!  
And my robot friend.  
My robot friend.  
My robot ...friend.

(Butters loses AWESOM-O, slow)  
Hey there, did you know I had a robot friend?  
We used to laugh and play, but someone took him  
away.  
He was my ten gigahertz old pal.  
My robot friend.
