And when you kiss your other lover  
I will try to understand  
and just because you're fucking him  
it doesn't mean you don't love me  
do what you want, be what you want to be  
Space is the place where I will go when I'm all alone  
Nobody calls me on the phone and I feel alone  
Meditating in the zone, all alone  
Space is the place where I will go  
And just because you kiss your brother  
it doesn't mean to say you're gay  
And just because you're fucking him  
it doesn't mean you don't love me  
Do what you want, be what you want to be  
CHORUS  
Space is the place, in your face  
Space is the place
