I, the personification of hatred  
Destructive being, attendance of the Meratreg  
I bring to thee the endless turbulences of "my death".  
I, the personification of wrath  
Infectious virus, bringer of sickness.  
My twisted tempts,  
Are covering the sun of "your miserable existence".  
I, the personification of perfection  
Splendor and Almighty creation of myself  
I am the filthy seed, procreated by the horns.  
The heart of darkness, the eye of the beholder.

Phantasms of the living  
For a stink called world  
Illusions of human realism  
Only sterile blackness prevail  
Emptiness and loneliness...  
Blacker than black

"Black blood within human flesh....  
Prevail the anti cosmic essence of times!!!"

I am the reminder of what men forgot:  
The reality of death, the mirage of life.  
At the edge of existence I stand, waiting in silence, the  
moment..  
I am the representation of despair  
I am the stone around your leg, the canon watching  
your brain.  
Suicide incitation, I am here e there just for my  
listeners.  
I am blacker the black

Phantasms of the living  
For a stink called world  
Illusions of human realism  
Only sterile blackness prevail  
Darkness and lifeless...  
Blacker than black
