We were getting fucked up
I said Mikey Love just struck out on the floor
These drugs will make your heart stop
But oh we just keep coming back for more

Whoa my heart radio is set to explode
Whoa instead I'm just dancing with you all alone

The sun it woke us both up
Came in your window and across the floor
To where she keeps her door locked
I swear she doesn't love me I just keep her warm

Whoa my heart radio is set to explode
Whoa instead I'm just dancing with you all alone

Through the static you were the only one
You were my S.O.S when I had the weakest love
Come on and fix me but now you tear me up
And wear me out like I'm all around
And through the static whoa you were the only station
on my Heart radio

Whoa she got me naked
Whoa smoked up in her basement
Whoa well aww can you take it?
Or do you gotta leave? Do you gotta leave?

Through the static you were the only one
You were my S.O.S when I had the weakest love
Come on and fix me but now you tear me up
And wear me out like I'm all around
And through the static whoa you were the only station
on my Heart radio

(You're the only station on) My heart radio
(You're the only station on) My heart radio
(You're the only station on) My heart radio is set to
explode
