"Follow On"

Shutters on the windows, chains upon the door
Sleepless nights spent waiting for an answer
Dreams of heaven falling, panic in the town
Lonely men with fingers on the future
When all is said and done, you are the only one

Chorus:

Follow on
For the open road is waiting
Like the song
We will welcome what tomorrow has to bring
Be it fair or stormy weather
Take my hand
And we'll the road together
I won't mind
If it turns out that we never find the end
For all I ask is that you want me for a friend

Days of beauty calling, vanish through a haze
Lost inside some spiral with no ending
Still you bring me loving, heal me with a touch
Lead me out to greet the calm descending
When all is said and done, you are the only one

(Chorus)

When all is said and done, you are the only one

(Chorus)
