She's armed and dangerous  
With her charm and a fatal kiss  
I would take on the world just to make her smile

Down, over on seneca street  
There's a girl who's got me tripping over my own feet  
Now, she's in the passenger seat  
So I'll take the long way home  
Just to keep her next to me a little longer  
I just don't want this ride to end  
I wish that we could drive forever  
We'll just keep chasing the sunset

My heart can't wait for this  
And you are my favorite mistake  
I won't take another breath just so she can breathe

All I want is to hear you say you get the same rush  
That I get whenever we touch  
All I know is what I really want now is you  
Wrapped up in my arms and tattooed  
Just the way you are

These sparks burst into flames  
And my heart is yours to take
