How to cry when this heart got walls all around
And I'm trapped here inside
You created this heaven of illusions and lies
Just left me to die
This sphere of loneliness will swallow all my heart since
We both fell apart
You just keep your mouth shut
You soldier of love
I should have killed you from the start

False trust, those feelings you made up it was reality to me
Your lips, your word tastes of the bitter poison that infects me
All those memories we shared,
there is so much I could love you for,
and for that I just hate you even more

You wanna go for a trip?
Its so easy to slip
You wanna go for a trip?

You wanna go for a trip?
Its so easy to slip...
You wanna go for a trip?
Straight back to hell where you belong

Seasons will change, time will fly
Like the mind of mankind
Your soul is free, butterfly
Though angels may cry

And I will smile again
