Untie me, this peace of mind can't let go
Beside me, the finer things start to show
Divide me into your life
Beat it down and it's lying on the floor

Feel, until' you're suffering
It's all for real and still you're suffering

I loved you, an inconvenience to me
I warned you because my world you can't see
I adore you, that's what you think
I beat you down and you're lying on the floor

Feel, until' you're suffering
It's all for real and still you're suffering

It's all for you
It's all for you
It's all for you

Feel, until' you're suffering
It's all for real and still you're suffering
Feel, until' you're suffering
It's all for real and still you're suffering
