Well I am green and you are blue
Together we create a hue
That's rather pleasing to the eye
And you are just the color compliment
A hue like me could really rather use

Well color chromaticism is the way
I would like to describe my feelings for you
Parallel but separate but close enough
So we can get to be more than just friends

Mix and matching colors
Makes for pretty pictures, sunsets,
Or cloudy rainbow raindrops
Swishing, swirling, whirlwind whispers saying
I like you
