There's no concrete theory in my hand
there's a vague philosophy i've read
there's a thought that i should think instead
there's a monster underneath my bed

there's a point to everything i've said
there's a sweet insanity ahead

it won't be too long until i'm falling
it won't be too long until i'm falling
it won't be too long until i'm falling

(solo)

it won't be too long until i'm falling
it won't be too long until i'm falling
it won't be too long until i'm falling..
