We picked him up in universe  
from another starship around  
He had crashlanded on a planet out here  
and fourteen years later he was found

From the very beginning he acted very strange  
but okay, he'd been alone for a while  
And maybe that also was the reason why  
he really behaved like a child

But when he didn't get what he really wanted  
things started to go wrong

Charlie X - full of power but still a child  
Charlie X - you'd better obey or he will really go wild  
He fell in love with Yeoman, played chess with Spock  
but he couldn't win those games  
Now he got mad, things were destroyed and  
disappeared  
but he still showed respect for James

We now realized the strength of his power  
and wondered what he would do  
Would he play around with us for a while  
then get tired and kill us too

But when he had the ship under total control  
the beings came and brought him home  
Charlie X - full of power but still a child  
Charlie X - you'd better obey or he will really go wild
