Big, yellow letters on the screen  
A cold voice of the machine  
We're drifting further away  
Nobody knows what to say  
And when we ask for a little help from our friend  
the only response we get is "Human Decision  
Required"  
We try again with a little help from our friend  
but the only response we get is "Human Decision  
Required"  
Getting ready for the next phase  
Suddenly: explosions near the moon base!  
Totally unpredicted  
but definitely self-afflicted  
And when we ask for a little help from our friend  
the only response we get is "Human Decision  
Required"  
We try again with a little help from our friend  
but the only response we get is "Human Decision  
Required"
