Carie, won't you come and see me, the clouds have hid  
the sun  
Let's take a chance and run with just what we can carry

Carie, won't you come and save me, I am of the earth  
But you are like a church with one hand in the sky  
And a face that answers why, won't you please just  
hear me

Everywhere I hear you, everywhere you call  
Everyday I feel the need to fall into you  
I need to be behind your castle walls

Carie, I see it all so clearly, the window's open now  
Let's take what fate's allowed, time may never come  
Let's take a chance and run with just what we can carry
