"Queen Of Bees"

Visit "[Queen Of Bees](#)" on MotoLyrics.com

Queen of bees you suck my life forever
weaving dreams like a fairy spider
you look so sweet are you what you seem?
so young and bright you shine you light lover

Am I betrayed by my own perception
I see love is it my obsession
queen of dance, dance my blues away
the little of joy will it come to stay?

I see a light where the wind blows
how can I find, only my god knows

You were my high, you were my everything
now we both died I stand here with nothing

Is it true, do I really sing about you?
it could might as well be about someone else
look around you're not the center of the world
they say truth lies within this word
