### "Descent Into Obscure Nihilism"

Agnostic morbid beliefs  
Scattered moral values are abstractly contrived  
Assert that morality does not inherently exist  
Mood of despair at a perceived pointlessness of  
existence  
Nihilistic epoch of mental plague  
Decaying aspects of modernity represent a rejection of  
theism  
Emptying the world of human existence  
Nothing has meaning  
The complete destruction of all meaning and all values  
Tantamount to suicide and mass-murder  
Diving into the silent meaninglessness  
Dissolution leads beyond skepticism to a distrust of all  
meaning  
Confidence to pessimistic philosophy  
Our existence has no meaning  
Ultimate departure  
Will to nothingness  
Life turns away from itself  
Sign of strength  
A willful destruction of the old values  
Self-dissolution of humanity
