Periodically change of orientation
Terms of the respective positions
Magnetic poles reverse their positions
Magnetic Pole Shift
Great erosion
World into turmoil - complete catastrophe
Extend deep into the Earth
Outer core of molten iron
Ranging million year hiatus in the Cretaceous Period
Several hundred thousand years
Magnetic field vanished altogether
The horizontal orientation of magnetite material
In the sediments and lava flows
Melting core fluid in the magnetic flux
Outer core of the Earth forming a chaotic system
Out of the chaos arising periodic geomagnetic
reversals
Effects of sunspot activity and solar wind conditions
Inhabitants is considerable
Fatal changes on life conditions
Solar highs and lows in the temperature cycles
Frozen world torn into pieces and absorbing by dark
outer space
