Depth is not far, descent is short  
Life under zero level  
Insensitive human form  
Crack sounds spiral of noises  
Absorbing all planet energy  
Non-physical forms of chaos  
Above the inferior human life  
Monumental collapse, evaporating slowly  
Defining the Virtual trance  
Reincarnating the inner ego  
Center of the cosmos  
Endless boundaries of inner god  
Astral cycle of death and rebirth  
Reborn of the consumed flesh  
Lost essential dignity  
Nonhuman birth  
Chapter in collapsed existence  
Chamber of blackened Silence falls  
Suicidal depression under winter hypnosis  
Descending to eternal obscurity  
Unearthly magnetic vacuum transforms to soulless  
existence
