### VERSE 1

Girl, you got me wrong  
We got along  
But not because of your strange chemistry  
You're in the workspace next to me  
And they got rules about this kind of stuff  
Lots of folks wanna rock the boat  
It's almost like they don't know you're not supposed  
To put your lips on a chick, that you got to know  
In the office, especially when she's one of your bosses  
Of course, it's due to the forces of nature  
That makes ya a fool when she offers  
To head to the saloon for a Foster's  
You're only gonna end up gettin' the boot by human  
resources

### CHORUS

Just say...  
No way...  
Someone stop me...  
Hey, I got benefits, man, this job's great

### VERSE 2

Girl, you got me wired  
It's awful dire  
Let's not get fired  
And it's not my Pops that hired me anyway...  
I ain't naming names...but you know what I'm sayin!!  
Meet me at the water cooler for a nightcap  
Nice memo, girl, did you write that?  
We're in the office and this is how Mike acts  
I don't think this is what you meant by my staff  
But despite that, we're doing the dirty  
To think, it all started out with you bein' flirty  
I bet you thought you'd never see Louis in early  
But this girlie's got her paws glued to my curlsies  
CHORUS

Just say...

No way...  
Someone stop me...  
I can't give all this 401K!

### VERSE 3

Girl, you got me whipped  
There's lots of fish  
To jostle with  
Just not in this strange seascape rendering  
Girl, you rocked my heart so hard  
It's off the doctor's chart  
And it smarts, but we ain't surrendering!  
They sent in the General Management  
And a panel for examining sexual harassment  
And the workplace analyst, heavy scrutinizer  
Our first date will happen, when they send me to retire  
Every supervisor likes getting ravished  
Tell me who's the wiser if their eyes never catch us in  
the practice  
If they do, they might let me have it.  
Damn girl you better have a nice severance package

### CHORUS

Just say...  
No way...  
Someone stop me...  
Oh all these unused vacation days  
Just say...  
No way...  
Someone stop me...  
I used to have such a great resume
