Lucy had a dream last night  
Lucy dreams in black and white  
Lucy was left there on her own  
Out in the field, out in the cold  
She had her summerdress, no shoes  
She had no plan, she had no clue

Maybe the angels beamed her down  
Maybe she hurried out of town  
Leaving a family behind  
Is someone missing her?

God knows where little Lucy goes  
She's alone in her dream in the field  
The men just moving in and out of her life

Just to prove she's not dead, she's alright

Lucy has a dream last night  
Lucy is beyond the skies  
Lucy is higher than a kite  
In the back of 60's Cadillac  
She has a stranger in her arms  
She ain't going back home until dawn

God knows where little Lucy goes  
She's alone in her dream in the field  
The men just moving in and out of her life  
Just to prove she's not dead, she's alright
