You knocked upon my door, sweet smile upon your face
I tell you I never thought I'd fall in love that easily
Love was never mine, just never read the signs
Till you found the narrow way to my soul
I never think that something will come along
It throws your mind completely into another world
And then I just open up my eyes, look through the light
And there you were now, there you will be forever
Then I just open up my eyes, I'll realise
That if I open my door you're going to stay forever in my heart
You stepped into my world, you turned my life around
I tell you, "Never want the complications in my life"
Another year goes by, still we're going strong
Looking all the strife straight into the i-ee-ice
I bless the day when your smile came along
You throws my mind completely into another world
No I just slowly close up my eyes, look into the soul
And there you were now, there you will be forever
Then I just slowly close up my eyes, I'll realise
That in my glowing ocean you're still gonna stay forever in my heart
Still gonna stay forever in my heart
