Ah yes thank you thank you thank you
That was a..nother one of my favorites a..
tune that I.. really like to do
Thank you thank you for that tip doll, thanks
Ahh y'know I'd like to..
play another one of my favorite songs that ah..
I'm sure all you guys and gals out there remember
Knowing love ah.. I remember when I used to be in love
and I uhh.. hope this song inspires you to..
get that same type of feeling like that I write about
[Spin 4th]
Bally boots, cashmere suits
SenTel cellular, girl with fat caboose
Slide so smooth, approach so slick
And all the - fine young ladies, love his clothes
He supposes, a rose would impress
He's schemin for a way, to get under her - skin
So he begins, to try to impress
Pulls out a knot, to show he ain't pressed
Puts it on the bar, but quickly picks it up
Whatever the lady had, please refill her cup

Baby what's your sign, where you from, what you doin'?

But what he really means is let's commence to screwin'

Now why bother, with, frivolity

Over in the corner, I saw you eyeballin' me

You're nothin' but a sniper, shootin' down men

But when I saw you starin' at me I knew I was goin' to win

The big prize behind door number two

Your legs I want in through, what you wanna do?

Let's make a deal, cause you know that I'm paid

All I wanna do is get a .. little, little, close to you

Not a little closer

Mmm, mmm, let me gain my composure

What's your name, can I call you back?

Since I'm rollin' fat, can I take you back

to, the flat, where I reside

When I leave I want you right, at my side

All this work said she leaves in the place

on this guy's arm and a smile on the face

Only thinkin' bout, the money that he makes

Droppin' lingerie at the bar for some papes

Why do girls fall for the glitz and the glamour?

Gotta be flashy, to pull a bunch of stunts

Then the thought hit me, just like the hammer

Girls judge a man by the way that he fronts

The frontline (16X)

[Jingle Bel]

Come up to the front, smoke with ? blunts

Pullin crazy stunts, to get what you want

Yes I gotta say you look too fat to be exact

Gotta 50 G car so of course, I mack

Cruise up to the bridge, chillin Cakalaka

If I had some shit, my boys held my back up

Half gold fronts, herringbone around my neck

Don't worry about that debit cause I get a daily check

Shackin at the Hilt', lampin at the Sheraton

If the night is good, I stay up in the Radisson

Reserve a room for two, but surely I would do

The honey dip fronts, she doesn't have a clue

Dug the boys in blue, sometimes I paid them off

Had trouble in the South, so I catch a train up North

Page me by my pager, if there's somethin major

Where the shit I gave you, you'll surely get your wager

And if you come up short, I smack you with my fist

In front of your girl, in front of your mom, fuckup you
won't be missed

Don't let me hear you riff, you just might end up stiff

You just might end up stiff, and no that's not a myth

I wish I could get out, the tricks of the trade

Can't work for Uncle Sam, and eat green eggs and
ham

So I'ma get mine, my pickup's at nine

One I hold a twenty, oh you'll be fine on the frontline

The frontline (16X)

[Damage]

Come up to the club, lookin fly as birds

Checkin out the scene, lookin for some curves

Moonlight kiss my car, shines with a gleam

Gotta be fat when I go and do my thing

I'm puttin on my chains, puttin on my beeper

Even though I have no service yo I look sweeter

Five star rims, ridin kinda low

Givin the impression of a well paid bro

Gotta lotta boys, hangin on the corner

But yo that's not my style cause I'm not Jack Horner

Got a nine to five, but hey you don't know

My impression's otherwise cause it makes the girls flow

Thinkin that I'm rich from the game or illegal fame

Gotta lotta dap from the boys who believe the same

Couldn't tell you why, I live this little lie

Tryin to be down, scramblin on the sly

Bet you was frontin, bet you it's kinda fun

Hangin with the girls, havin good times

Boys big fun when you're hangin on the front

on the front on the front when you're on the frontline

The frontline (16X)
