You run run run
You do run run
You run run run
You do run run

You and me and Johnny got out free
We searched all night, the usual streets
Johnny says there was only one man
Out that late who could be trusted
Go on runnin' through the jungle
That's all there was between me and you
We were runnin' through the jungle
The city streets, shooting the blues

You run

The hours late
The night just got started
Eastside's packed with thieves and lovers
He knew a junk joint just down the block
The last place the cops haven't discovered
We went runnin' through the jungle
That's all there was between me and you
And we went runnin' through the jungle
The city streets living to lose

Forget your feelings and all your emotions
The life inside you been dead or dying
Sentence to walk with strangers now and forever
Go on believing every trick the devils trying
Runnin' through the jungle
That's all there was between me and you
Runnin' through the jungle
The city streets, shooting the blues
