Still as the stars  
In the heavens above  
And slowly blossoming  
As a new found love  
Still as the night  
Still still the birds gently sing  
And soft as the wind  
That carries them on their wings  
No changes may come,  
People may go, with so many changes  
But I, I, I, I, I  
I love you still  
I II, I II, I II  
I II love you still  
Still in my mind  
At the end of the day  
And soft on my shoulder  
Where your head gently lays  
Still with me now when I think  
How I love you so  
And never trough changes

Other people must go  
Now people may change  
Changes may come  
Theres so many changes but I, I, I, I  
I love you still  
Now I II, I II, I II, I II, I II, I II  
I love you still  
I lala lala lala  
I always will  
I I II, I II, I II, I II, I II, I II, I II  
I II love you still  
I lala lala lala  
I always will  
If they dried up the oceans  
And they blot out the sun  
And the world  
was torn into pieces  
I know that we'd stay as one  
I II, I II ...
