(chorus)

Christmas is the time to say I love you
share the joy and laughter and the cheer
Christmas is the time to say I love you
and a feeling that'll last all through the year

come in, all the carolers are singin'
there's a touch of magic in the air
from grownups to minors, nothin' could be finer
times are hard but no one seems to care

Christmas, even all the world is watching
for Santa Claus' reindeers in the dark
from rooftops to chimneys, from harlem to brimney
they will find a way into your heart

(chorus)

just outside the window snow is fallin'
but here beside the fire we share the glow
the moonlight and brandy, sweet talk and candy
sentiments that everyone should know

memories of the years that are behind us
wishes for the year that's yet to come
and it stands the reason, good friends and season
make you feel that life has just begun

(chorus)

so spirits go right out
in hopes of shinin' bright out
and you know that Christmas time is heeeeeeeeeere
