You Always used to say  
How I could Find you waiting for me  
And you'd always find your way  
back to the beginning  
You'd say You'd come right back  
To find me waiting there  
But I never Got a second chance  
to say I love you say it out

Woah

But Now... I see you standing there  
Now... I think i found myself  
(but I've) been dreaming of you  
all for me  
(all that) never came true  
and i saw right through you

oh

Don't give up the faith  
find out how it came

Its basically just hurting here  
but you'll never have to listen  
To me cry again  
We were so strong

Oh

I cant keep this up right now  
need you here somehow  
held my heart  
you gave it life  
your my dream and your my life  
don't forget bout me  
cause ill show you what you mean  
You and me.
