VERSE 1:

Because I'm so stupid and such a fool
My eyes don't see nobody but you
Even though I know you love someone else
You could never know the pain that I felt
Oh oh oh

VERSE 2:

You probably never think of me at all
And I know we have no memories
But the one who really wants you is me
In the end only my tears will fall

BRIDGE 1:

I stay, you walk away
I stand back, watching you day by day
You can't see that I'm so in love with you
Like the wind you just fly right through (ohhhhh)

CHORUS 1:

There are days when I just miss you so much
There are days when I just long for your touch
"I love you" somehow flies right off my lips and so
Once again I'm left crying for you
Once again I'm left here missing you
Baby I love you I'm waiting for you

VERSE 3:

You'll probably never have a dream of me
And I know I'm in love all alone
That's why we don't really have memories
In the end, I'll make them all on my own

BRIDGE 2:

Love's like a river of tears
That will flow whenever you're not here
Even though your heart will never be mine
It's enough just seeing you smile

CHORUS 2:

There are days when I see nothing but rain
There are days when I just feel so much pain

"I miss you" somehow flies right off my lips and so
Once again I'm left wishing for you
Once again I'm left here missing you
Baby I love you I'm waiting for you

VERSE 4:

Bye, bye, never say goodbye
Even though it's not me by your side
I need you, I just can't say it but I want you
I cannot stop wishing for you

CHORUS 3:

There are days when I just miss you so much
There are days when I just long for your touch
"I love you" somehow flies right off my lips and so
Once again I'm left crying for you
There are days when I see nothing but rain
There are days when I just feel so much pain
"I miss you" somehow flies right off my lips and so
Once again I'm left wishing for you
Once again I'm left here missing you
Baby I love you I'm waiting for you
