The more I feel
The more I die
Nothing to give
Nothing inside
Everything I touch I break
Everything I touch I break
Everything I touch I break

I scratch and tear
Until it bleeds
I do not want
I only need
I only need
I only need

Everything I touch I break
Everything I touch I break

Everything I touch I break
Everything I touch I break
Everything I touch I break
Everything I touch I break

How Can I Hold On (Dog Attack)
Back when you were my life
You gave me something that I could live for
Now everything's changed
And you're gone
But I'm still here waiting
