[Chorus:]

come and feel my love, feel it baby
come and feel my love tonight
the pressure's on
feeling down inside
where the mood may sets
let the world is listening
their dreams are probably no more
jammin' across the nation
we can't take the sittin' down
the beat's in my feet
release the body heat
shove the fears outside the door

[chorus x2]

I've been watchin' you from forever
the world needs love
we all need to escape
hold the hands of fate
just move your body with me
everybody get up
find out with what you got
just create your space
if it's yours to take
the groove will set us free

[chorus x2]

I always knew I had in me
and if I'm working hard, I had to be
I'm fine, young, pretty as can be
I'm Stacy Lattisaw from D.C.
Can you dig it? (can you dig it?)
Can you dig it? (can you dig it?)
what you are, be a shooting star
just go for what you know
in your prime, you're right on time
come on, now let it show
let me hear you say show (show)
say show (show)

got a party over here, we're gonna keep it tight
gonna keep on jammin' 'til the morning light
got a master groove on the line
look out for that dynamite
say dynamite (dynamite)
say dynamite (dynamite)
Are you havin' fun? We're number one
dancin' to the beat
I don't have the time to wait in line
so let's take it to the streets
let me hear you say ho (ho)
say ho (ho)
it's all in you, whatever you do
just listen to what I say
need the rest, just be the best
come on, it's the only way
let me hear you say number one (number one)
say number one (number one)
it's the only one (only one)
say number one (number one)

[chorus x2 'til fade]
