Two hearts together we're a harmony so right
Two sparks united we're a fire burning bright

Only two, always brand new
Right from the jump, we had a hunch
That we have everything

Chorus:

Perfect combination
Love plus you and me
Perfect combination
We couldn't ask for any better
Perfect combination
We fit to a tee
A perfect combination
We're all it takes to last forever
Together

So deep inside we share a feeling that's so rare
So sweet, just knowing that we are a special pair

Right on time
We're two of a kind
And heaven knows
This love will grow
Stronger everyday

Repeat chorus x1

We can conquer any mountain
Just as long as we're together
Cause as one we are an endless fountain
Overflowing with love
Perfect love

Repeat chorus till fade
