### "Nobody Else"

Visit "[Nobody Else](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I'm falling off a cliff, and I ain't worried 'bout a cushion  
I'm utterly in love with this limit that I'm pushin  
No more talkin 'cause the proof is in the pudding  
Behind a great man they say there's a better woman  
So women of the world, we need you more than ever  
'Cause when you heal a man you bring a nation  
together  
And when a man is hurt he shovels you his abuse  
And then we teach the kids, that's the trouble with the  
youth  
I'm thinking about a way I can help us get the message  
Maybe through my music I'll eliviate the stresses  
Everything I've learned I learned from my mothers  
essence  
And thanks to her I'm unafraid to ask the tougher  
questions  
Believe me you, I know it's gettin' hard  
The type of shit that make you not even believe in God  
But listen to my words, hopefully I change the odds  
'Cause the true meaning of faith is believing in your  
cards Awe...

Ain't nobody else gon do  
The things, you do, for me and that's my word  
Forget the thug in your life  
When you need a little love in your life... Call me

So baby it ain't a thing just tell me what's on your mind  
No hesitation there's dinner reservations at nine  
Glorious love let's celebrate it with some wine  
I'll look into your eyes and tell you everything is fine  
'Cause everything is fine, especially you  
I'll never take for granted what you blessedly do  
I speak it from the heart so every message is true  
And after all it is my heart that led me to you  
So faith over fear, it's pretty simple and plain  
I love the way you smile and how your dimples arrange  
The way you find beauty in the things that are strange  
And when we make love you sing in the perfect range  
Sorry to be blunt, but this is all I know  
Forget what's on your mind, and follow what's in your

soul  
Without a single word, I can feel that you know  
Just like when I close my eyes I can still see you glow  
woah...

Ain't nobody else gon do  
The things, you do, for me and that's my word  
Forget the thug in your life  
When you need a little love in your life... Call me

I see you baby I just wanted to  
Let you know that, you've got my love  
There's few women out there now days  
That actually respect themselves  
And hold themselves in the right light  
So I just figured I'd shine a little more light your way to  
keep you up

Ain't nobody else gon do  
The things, you do, for me and that's my word  
Forget the thug in your life  
When you need a little love in your life... Call me
