[Verse 1:]

I do this for my culture, no image to protect  
Just broken down lives and broken objects  
Disgusted with how far that my greedy eyes stretch  
Preoccupied with fame 'cause I'm tryin' to be the next

No famous relative to help me with my master plan  
Just family members that came overseas from other  
lands  
Shit, I'll fake a smile before I walk around depressed  
Plus I want success I'm not accepting nothing less

They say a man is judged by the way that he provides  
I don't wanna have to die for people to realize  
Followin' a trend to me is I'll advised  
'Cause the world will judge you regardless of how you  
feel inside

Niggas say they fly but they ain't touch the sky  
They ain't even off the ground, they just talkin' from  
their pride  
It's easy to reside in the valley where we walk  
But it's harder to think before you even get to talk

[Chorus:]

Before I lay my head to go to sleep  
I say a little prayer for my soldiers in the street  
'Cause I don't wanna die for people to realize  
I'm looking for a sign but it'll be alright [x2]

[Verse 2:]

These damn gucci niggas got no love for us hoopy  
niggas  
And all the wild groupie ladies wanna mooch our  
figures  
Scorsese couldn't make a better movie picture  
Like Mumia Abu Jamal I capture all my listeners

Freedom is relative, I'm feeling like a prisoner  
Every day I'm sicker 'cause I got dropped by SIGNA  
Now it's beneficial cards and mediocre service

And I'm startin' to go nuts the media's a circus

They say here's where all the meteors are headed  
I love startin' drama, I'm learning how to dead it  
I love doin' work and giving God all the credit  
I live life wisely so I don't regret it

I'm a supernova so my aura's so magnetic  
And every time I spit a verse it get's eclectic  
Gotta show these skeptics they could never critic  
And if they wanna get it, they could get it

[Chorus:]

Before I lay my head to go to sleep  
I say a little prayer for my soldiers in the street  
'Cause I don't wanna die for people to realize  
I'm looking for a sign but it'll be alright [x2]
