If I knew back then
All the things I know today
Baby I would not have changed one hour
'Cause I learned so much from my mistakes.
All the nights we cried
And we prayed we see the mornings light
We never thought that we could ever make it
And you were sure
You'd never hear me say
This is the time.
This is the moment.
We've waited so long
Just to be standing here.
We had a dream
We made it happen
Nobody believed we could get this far
And now, I know that this is our time.
You never wanted any fortune or fame
You said baby just give me your heart
And now I'll tell you
Without any shame
That you were right from the start
Staying together, it ain't been easy
In a world that changes so fast
But take a look around
Or feet are squarely on the ground
'Cause we've found a love that can last
And it seems so clear
I know that this is going to be out year
We'll forget all the pain and sorrow
And we'll forget about the times we failed.
This is the time.
This is the moment.
We've waited so long
Just to be standing here.
We had a dream
We made it happen
Nobody believed we could get this far
And now, I know that this is our time.
