How come you left me?  
How come you went away?  
As we made a promise  
Remember until the end  
Together, we will live  
Together, we will cry  
Together, we'll reborn  
Together, we will die

There's nothing now  
Just this black rainbow  
With your ashes i have danced  
As you finally fade away

As i reached the final parade  
One cold wind was passing by  
After all we will be one again

Here i am breathless  
And confused by whispers  
Save me from myself  
Out from the heavens  
I'm dying tonight  
Won't you help me  
To save myself (from myself)

i'm coming to you, one lost breath...
