What up?  
You want me to take you to another level?  
Just holla at your boy  
Right now, Imma take you for a ride  
Feel me?  
Just listen

Baby it's late; can you take me home  
Bring me somewhere we can be alone  
'Cause, you know, I'm a little tipsy  
Light me up and, baby, kiss me  
Come and, baby, do it quickly  
I don't wanna talk so keep my mouth busy

Little missy  
I feel like burning  
You're who I'm yearning  
I'm ready for friction  
Sparks fly, up high  
Baby, make me feel like I never felt before

Hold me close by your side  
Baby, never let me go through the night  
As I open my eyes  
Baby, kiss me from my nose down to my

Baby, come here and I'll make you see  
Take you to a place where we can be free  
Boy, you put me on fire  
Come on, baby, take me higher  
And fulfill my desire  
Don't talk, just give it a try

And blow my mind  
Don't keep me waiting  
I know you want it  
Now, let's get it started  
Lead me, feel me  
Baby, let me hear it that you wanted more

Hold me close by your side

Never let me go, never let me go, never let me go  
As I open my eyes  
Kiss me on your nose, to my

Ooh baby, ooh baby, ooh baby  
Where'd you learn to work that way  
I said you, you, you  
You are driving me insane  
Would you come with me, babe

Hold me close by your side  
Baby, never let me go through the night  
As I open my eyes  
Baby, kiss me from my nose down to my (oh oh oh)

Hold me close by your side  
Baby, never let me go through the night  
As I open my eyes  
Baby, kiss me from my nose down to my

Hold me close by your side  
Baby, never let me go through the night  
As I open my eyes  
Baby, kiss me from my nose down to my
