(V1)

Not so fast your burning like there's no tomorrow  
Got your head down body's flying but your on the  
ground  
Do you hear me said the voice crying through the alley  
Come closer I'm in the water can you help me breath

(Chorus)

Give me fire  
Look behind  
She's getting closer  
Take your time

Call me out now  
Staring straight  
I'm headed towards  
A different gate

(V2)

Not my word don't want it cause you hate the answer  
Like the old self can you fight it when it's just begun  
All eyes waiting words are louder when softly spoken  
I hear you keep quite and I'll pick you up
