Ageless beauty
Cruelty makes its holes
But on the shoreline
Time will hold its promise

We will always be a light
(You can see it from the surface, see it)
We will always be a light
(You can see it from the surface, see it)
We will always be a light

Tattered fingers
Linger on the warm and foolish
Hardened faces, graceless
We'll lose the battle

We will always be a light
(You can see it from the surface, see it)
We will always be a light
(You can see it from the surface, see it)
We will always be a light
Oceans won't freeze
So loosen your heart
Underestimated
Undefeated in this love

We will always be a light
(You can see it from the surface, see it)
We will always be a light
(You can see it from the surface, see it)

We will always be a light
(You can see it from the surface, see it)
We will always be a light
(You can see it from the surface, see it)

We will always be a light
(You can see it from the surface, see it)
We will always be a light
