Lonely coffee cup
Where's your friend where's your how's your sugar
I'm the only one that is staring at your shape

This is only a rehearsal
This black spot is just a test of who you are
This is only a rehearsal
You could come back as a roach or a butterfly

Stupid sugar drop
Hide your face
There is no one that wants to hear you sing
Who's this only one that would stay to hear your song

This is only a rehearsal
This black spot is just a test of who you are
This is only a rehearsal
You could come back as a cockroach or a butterfly

I need you
I came unglued
This pale light red
Falls on me instead
