Be safe, don't come near me
Your innocence, love and burning
Cry out loud

You'd better get some soul
When you're in the city, girl, your aching soul needs to
breathe

Dream safe, dangerously
Your innocence, love and yearning
Die out loud

You'd better get some soul
When you're in the city, girl, your aching soul needs to
breathe

It's kinda like the sun beat through the shade
It's kinda like the love you never gave
It's kinda like you'd better get some soul in your being

Brake light won't you come on back to me?
Show me all the things I'll never see
Kinda like you'd better get some soul, soul, soul

And when it feels like rain she says
I take it to ease the pain

You'd better get some soul
When you're in the city, girl, your aching soul needs to
be

It's kinda like the sun beat through the shade
It's kinda like the love you never gave
It's kinda like you'd better get some soul in your being

Brake light won't you come on back to me?
Show me all the things I'll never see
Kinda like you'd better get some soul
You'd better get some soul
You'd better get some soul, soul, soul
