Funny how it all just fades away to soul decay
From the things the world can say or can I say?
Everybody needs a little moment of truth
When they find the new, a new way to live with
themselves

Nobody ever had a clue
Or know what to do when they had a little feeling called
love
And nothing ever had to wait, if they came to hate
'Cause you can hate anything before you even try to
love it

Love is a chemical straight from your genitals
Never is spiritual, never unconditional
Love is a chemical, nature is radical
Never is spiritual, it's never medical

And everything you've ever known today
It's all the world can give you
Don't believe in love or hate
It's only a chemical

Yeah I'm sorry that you never understood and it'll do
you some good
If you look around and find out for yourself
You need a little push to shove, test your love
Will that person burn for you
Love is a beautiful way to face the day
But everybody's got it wrong, everybody's got it wrong

Love is a chemical straight from your genitals
Never is spiritual, never unconditional
Love is a chemical, nature is radical
Never is spiritual, it's never medical

And everything you've ever known today
It's all the world can give you
Don't believe in love or hate
It's only a chemical

And I don't wanna be the one who has look back

Knowing my whole life was a lie
And I don't wanna be the one who has regret
Everything you keep inside

And I don't wanna spend another minute
Caring for the things you told me
And anything I ever gave you I'll take it back
I'll never be, never be, your sacrifice

Love is a chemical straight from your genitals
Never is spiritual, never unconditional
Love is a chemical, nature is radical
Never is spiritual, it's never medical

And everything you've ever known today
It's all the world can give you
Don't believe in love or hate
It's only a chemical

And everything you've ever known today
It's all the world can give you
Don't believe in love or hate
It's only a chemical

Chemical
