Man's inhumanity towards man
Stop it when it first began
Tell them this road's to die on, goes nowhere
A land they're never supposed to reach or be kindly
received
They'll just dropped to their knees
To the nowhere land

And in the orphanage they run for their beds
They run from the men in the building
And the allies just watch, whisper and talk
And one million are marched to a nowhere land

Nowhere land, nowhere land, ay
Nowhere land, nowhere land, nowhere land, ay
Nowhere land, nowhere land, nowhere land, ay (Ada,
stand up now)

I'm not calling out a warning
For all is not well there's so little time
Please sir there's women and children,
they lie where they fell they've done nothing
wrong, nothing at all

You said enough you'll set him off
You said enough you'll set him off you'll set him off
You said enough, you said enough

He'll tell his story they said he don't lie
He'll tell his story he said he don't lie
