forcing me to win  
broken down in sin  
submarine skill  
meant to kill

i found myself undone  
down you faceless one  
forcing me to win

my openness for you is free  
the one thing you want you can not see

tools will always fail  
still we will prevail  
castles made in sand  
in nowhere land

i feel i've overcome  
in the minds of some  
i'm not already dead

my sergeant tells me to shoot three  
it's the thing you hide you leave inside  
you have no pride

broken down  
found undone
