Raise a glass now to the person  
Who invented the word called scum  
He was clever never foolish  
And he knew where you came from  
You're a bumbag and a vexer  
And you never let your standards slip  
Cause your standards are so low-down  
Like the pavement  
You find when you trip

But I won't trip over  
Look over my shoulder  
You won't get the better of me  
The credit you owe me  
Respect you don't show me  
All makes the better for me

Ooh you look so good from afar  
Ooh you're just a bumbag  
Yes you are

You're a parasite you're a virus  
You only ever make mistakes  
Like a leper or a tapeworm  
You only ever seem to take  
Now you're livin' with your language  
And everyone's avoiding you  
Ask for money ask for cigarettes  
It's all you ever seem to do

But I won't trip over  
Look over my shoulder  
You won't get the better of me  
The credit you owe me  
Respect you don't show me  
All makes the better for me

Ooh you look so good from afar  
Ooh but you're just a bumbag  
Yes you are

All my friend's heads seem to go down  
Whenever you decide to turn up  
Feel so sorry for your parents  
When they see your face  
They must spew up  
You're the black sheep  
You're the distance  
You should keep your wits  
About you in town  
Because one day it could kill you  
And your body never will be found

But I won't trip over  
Look over my shoulder  
You won't get the better of me  
The credit you owe me  
Respect you don't show me  
All makes the better for me

I won't trip over  
Look over my shoulder  
You won't get the better of me  
The credit you owe me  
Respect you don't show me  
All makes the better (x4) for me
