When you're lyin' there in bed, late at night and all  
alone  
With nothin' on but the radio  
Listenin' to the midnight man takin' telephone requests  
Playin' songs that you and I used to know

Do you ever think of me and all the nights that we  
wasted,  
And can't get back again  
But if we ever do, honey I promise you  
I'll even love you better than I did then

When you go for a walk in the leaves when it's cold  
Or lay, when it's warm, in the sun  
With time on your hands, and memories on your mind  
Or a long sleepless night has just begun

Do you ever think of me and all the nights that we  
wasted  
And can't get back again  
But if we ever do, honey I promise you  
I'll even love you better than I did then  
I'll even love you better than I did then  
I'll even love you better than I did then
