

Status Quo "Claudie"

Visit "[Claudie](#)" on MotoLyrics.com

It's so long since I sang songs to you
I forget all the words I once knew
I could look back but I can't waste the time
Did it matter, they sometimes didn't rhyme
It's so long since I sang songs for you

It's so long since you smile just for me
Now your smile's just an old use to be
Does it matter that I can take the time
Would you rather, I write you one more line
Can my songs once again be for you

Claudie made a fool out of me
Made me find another place to be
I've been living alone in a house that wasn't my home
With Claudie is the place I want to be

When I left did you think of me crying
Did you care that I felt I was dying
I pretended that I don't give a damn
All along I know what I really am
I'm a fool, little Claudie, just for you

Claudie made a fool out of me
Made me find another place to be
I've been living alone in a house that wasn't my home
With Claudie is the place I want to be
