

Status Quo "Never Too Late"

Visit "[Never Too Late](#)" on MotoLyrics.com

The world is in a mess
And finished more or less
It doesn't really matter
And it's maybe too late to change it
It's never too late to change it

Did you take a look?
Any sort of look
I'm sure you would remember
'Cos it wouldn't need much explaining
'Cos it's never too late to change it

The world is in a mess
And finished more or less
It doesn't really matter
And it's maybe too late to change it
It's never too late to change it

It's never too late for changing
Never too late for changing

Now this old sea dog's gonna get away across the
water
This old sea dog is waving you, bye bye
But I don't think God thought, we'd get out of order
This old sea dog is waving you, bye bye

Now it's getting late
Too late to hesitate
I can't wait any longer
So there's no use in you complaining
(No use complaining)
'Cos it's never too late for changing
(Never too late for changing)

Now did you take a look?
Any sort of look
I'm sure you would remember
'Cos it wouldn't need much explaining
(Need much explaining)
'Cos it's never too late to change it

I've told you once or twice
It could be paradise
So listen when I'm talking to you
It shouldn't take much explaining
(Shouldn't take much explaining)
The world is gonna need some changes
(Need some changes)

Never too late to change it
(Too late to change it)
Never too late for changing
(Too late for changing)

Never too late to change it
(Too late to change it)
Never too late for changing
(Too late to change it, too late to change it)

Now this old sea dog's gonna get away across the
water
(Too late to change it, too late to change it, change it)
This old sea dog is waving you bye bye
(Too late to change it, too late to change it, change it)

But I don't think God thought we'd get out of order
(Too late to change it, too late to change it, change it)
This old sea dog is waving you bye bye
(Too late to change it, too late to change it)
