My world is on fire
My lifes overwhelming
Just breathe
Youre on the next train to life without me
Time had nothing left to show
So we found out a world on fire
A life overwhelming

Do you believe the words you said to me?
As you take away everything?

Well I cant believe what youre saying
So dont tell me
The words that kill, the words that kill
Youre leaving

I spend my time thinking about you
Remember when we said that this would not end?
And now youre gone
Im still right here without you
A world on fire
A life overwhelming
Just breathe

So do you believe in the words you said to me?
As you take away everything?

Well I cant believe what youre saying
So dont tell me
The words that kill, the words that kill
Youre leaving

So take back what you said
That would never end
The words that kill, the words that kill
Youre leaving

Theyre killing me
Theyre killing me

And I cant believe what youre saying

So dont tell me
The words that kill, the words that kill

Well I cant believe what youre saying
Dont tell me
The words that kill, the words that kill
Youre leaving

Well take back what you said
That would never end
The words that kill, the words that kill
Youre leaving

Take back what you said
That would never end
The words that kill, the words that kill
Youre leaving me
