"Outside Looking In"

Visit "[Outside Looking In](#)" on MotoLyrics.com

It looked so good from the outside, I couldn't wait to
join the crowd

It all looked different on the inside

It must have been my imagination

I felt so sure that was where I wanted to be

I thought I'd get out of the city, I took a trip down to the
sea

I didn't stay too long 'cause there was nothing there but
sky and ocean

Oh yeah, it must have been my imagination

I really thought that was where I wanted to be

Looking for something that might have some meaning

Looking for something that might make me feel alive

Looking around for the right situation

Where I can believe what's happening right in front of
my eyes

I think I'll stay in one position, and just leave well
enough alone

I'm never satisfied 'til I've been disillusioned

Oh yeah, it must be my imagination

I always think there's a better place to be

Looking for something that might have some meaning

Looking for something that might make me feel alive

Looking around for the right situation

Where I can believe what's happening right in front of
my eyes
